

SMART AUGMENTED MOBILE

Full stack developer SAAS

Strengthen our team and help shaping our solutions!

Gemsotec is a fast-growing start-up from Leuven that builds mobile and innovative applications for industry. Gemsotec has been renowned for its user-friendly applications for industry, winning prizes awarded by Agoria, Fireforum and BEMAS. Gemsotec is looking for an enthusiastic **full stack developer**, someone who likes to set out the technical lines. Together with your team you ensure that the developed software meets the needs of our customers. We market two products, GoRound and INA.

Are you looking for a job with a lot of responsibility and flexibility, the chance to learn aspects of team lead, QA and design? Are you in to be our SaaS specialist, helping us to organize all aspects of a SaaS product and bringing us into the API economy? Do you want to feel the start-up spirit from very close and work in a young team with like-minded colleagues? Do you want to immediately see the impact of developed features? Do you want to contribute to a safer public and industrial environment, a more digitized way of running a production factory and work for major industrial customers?

Your responsibilities:

- You will be involved in the concept, design, functional specification, documentation, development and testing of the final product
- Together with the team you develop and maintain the Gemsotec software. These are SaaS products targeted to field workers in industrial plants and firefighting.
- You are involved in continuous improvement and ensure that a high quality standard is maintained.
- You monitor the most important relevant technological developments.
- You help to ensure support for Gemsotec customers.

Your profile:

- You have a master's degree in computer science or software engineering and 3 years of experience in programming mobile and web applications (full-stack Javascript / Typescript environment)
- You have experience with building SaaS products and the API economy
- You have a strong experience in backend components, devops and deployment. Preferably you have experience with React and React native, AWS and Google Cloud Platform. Experience with AI and data science is a plus
- You score as a team player, you are flexible and work customer-oriented and like to deliver quality.
- You are hands-on and have an agile mindset.
- You can communicate fluently in English.

Our Offer:

- You work in a challenging context with many opportunities.
- A competitive salary with fringe benefits.
- A good work life balance thanks to flexible working hours and the possibility to work from home.

Are you the ideal candidate for this opportunity? Send in your CV and explain why you would be ready to take up this challenge: info@gemsotec.com
